Magnolia Metal & Plastic Products, Inc.

WELCOME

Welcome to the updated Magnolia Metal & Plastic Products, Inc. Catalog. This catalog will replace all existing catalogs to date. Please discard previous catalogs in order to avoid confusion.

With the introduction of the new catalog also comes the introduction of new parts and products! Look for these parts inserted into their respective sections.

THE MAGNOLIA DIFFERENCE

Established in 1995, Magnolia Metal & Plastic Products, Inc. has evolved from a small, regionally focused company, to become a nationally recognized leader in the manufacturing of metal and plastic products. Magnolia Metal & Plastic Products, Inc. serves customers in the Fenestration, Cabinet, Furniture, and Concrete industries, and has a reputation for producing quality products, while maintaining competitive costs.

Magnolia Metal & Plastic Products, Inc. is constantly striving to reach new heights with their phenomenal levels of customer service and their integrity to perform well above standards. Magnolia Metal has what it takes to be your first choice in the industry.

FROM THE PRESIDENT

Greetings,

The growth and success of Magnolia Metal & Plastic Products can be attributed to many things, the most outstanding of which is our people. Our entire staff is dedicated to providing you, our Valued Customers, with the best service in the industry. I am very proud to have been able to put together a staff with the same commitment to our customers that our family based the company on. You have my word that this same commitment to service will continue to be the backbone of our company. We look forward to building new relationships and serving you in the future.

A handwritten signature in blue ink that reads "Tony Malik".

Tony Malik
Owner/CEO

Every effort has been made to ensure the reliability and accuracy of the data and specifications contained within this publication. Product photographs, colors, and numbers are used for reference and comparison purposes only. Please contact your representative for samples and detailed information. It is full responsibility of the product user to determine the suitability of these products for a specific application. Defective products will be replaced, with authorization, without charge if returned within 30 days. No liability is assumed beyond such replacement.

TERMS AND CONDITIONS OF SALE

TERMS OF SALE

For accounts approved by our credit department the terms are 1% discounts for payments received within 10 days of invoice date with net due 30 days from invoice date. (1% 10 NET 30) Good credit is an asset to any business. Please help us give your company a good credit rating by keeping your account balance current. All orders will be shipped C.O.D. prior to credit approval.

PAST DUE ACCOUNTS

All accounts with balances past forty-five (45) days will have orders placed on hold until the past due balance is paid to current status. All accounts with balances past sixty (60) days will be placed on C.O.D.

RETURNED CHECKS

Returned checks will be charged a \$25.00 service charge and the account will be placed on C.O.D. Cash on Delivery ONLY.

RETURNS AND ADJUSTMENTS

Approval for material that is being returned must be obtained from our customer service department. A Returned Goods Authorization will be issued for approved returns and must be printed on all shipping documents and bills of lading. No returned materials will be accepted without a valid R. G. A. Number. Unless return is for reasons of defective material or other extenuating circumstances, there will be a 20% restocking charge with a minimum charge of \$5.00. Any claims must be made within 15 days of invoice date.

MINIMUM ORDERS

There is a \$50.00 minimum order per invoice. Individual conditions may vary.

WARRANTY

All products are sold "as is" without warranty, expressed or implied. Included is the condition that the purchaser(s) shall make their own tests to determine the merchant ability of such products for any particular purpose. The liability for Magnolia Metal and Plastic Products, Inc. for special, indirect or consequential damages for injury to property and/or person for anyone or any other loss resulting from a product or failure shall be limited to the purchase price of the product.

FREIGHT

All freight is F. O. B. Vicksburg, Mississippi. Prepay and add with deep discount tariffs are available as an option where applicable.

FREIGHT DAMAGE

All damages must be noted on the freight bill at the time of delivery and reported to customer service within 24 hours of receipt of shipment. An exception number must be obtained from the driver and CLEARLY noted on the freight bill and the bill of lading. Any claims for damages and shortages must be marked clearly on the bill of lading and signed by the driver. If concealed damage is suspected it must be noted on the freight bill and signed by the driver and customer service must be notified within 24 hours of receipt of shipment. A credit memo will be issued to your account only after the freight company approves the claim. No claim for freight damage or shortage will be honored unless notations have been properly made on carriers freight bill at the time the damaged or short shipment is received. The carrier assumes all liability for damages and shortages. The customer is responsible for immediately filing a claim with the carrier. All collect shipments customer is responsible for freight claim. Please see following page titled "Packing Slip Stuffer - Lost / Damaged Information" for best practice directives. Customer Service will gladly help in answering any questions if assistance is needed.

**Packing Slip Stuffer
LOST / DAMAGED
INFORMATION**

*** * *IMPORTANT INFORMATION* * ***

*** PLEASE READ THE FOLLOWING ***

THIS SHIPMENT CONTAINS _____ CARTONS.

Please count your shipment BEFORE signing.

LOST / DAMAGED GOODS INFORMATION

When the CARRIER signed the Bill-of-Lading, which covers your shipment, receipt was given that the shipment was complete and in excellent condition.

If any of the goods called for in this Bill-of-Lading are short or damaged, **DO NOT ACCEPT THEM** until the truck driver makes a **DAMAGED / LOSS** notation on **YOUR FREIGHT BILL** and also includes an **EXCEPTION NUMBER**.

**YOU SHOULD THOROUGHLY INSPECT THIS SHIPMENT
AS SOON AS RECEIVED**

If **CONCEALED DAMAGE** is suspected or discovered it must be noted on the freight bill and signed by the driver. If **CONCEALED DAMAGE** is discovered **AFTER** acceptance – **YOU MUST** - notify the freight line **IMMEDIATELY** and request an inspection. **THIS IS ABSOLUTELY NECESSARY!** Transportation companies will not honor any claim for loss or damage if the agent does not make an inspection. If the agent will not make an inspection, then you should make an affidavit that you notified him / her on the shipment receive date and he / she failed to respond. This information along with other documentation will help support **YOUR CLAIM, WHICH YOU SHOULD FILE IMMEDIATELY.**

Please contact Customer Service if you need assistance with your claim. We are willing to assist you with your claim at any level.

TOOLING SERVICES

MOLD AND DIE SERVICES

*** SERVICES ***

MOLD & DIE DESIGN
MOLD & DIE FABRICATION
RAPID PROTOTYPES
EDM SERVICES
CNC MACHINING
PRODUCTION MACHINING

From design, to samples, to parts production, our turn around times are extremely efficient due to the designing and building of molds and dies in house. We offer our customers rapid prototyping with lead times of one week or less. The use of standard mold components and inserts allow tools to be manufactured in as little as two weeks depending on the complexity of the finished parts. Custom machining and production machining are also offered; Whether you require one special part or a production run of repetitive parts.

PROCESSES

INJECTION MOLDING DESIGN AND FABRICATION

Magnolia Metal & Plastic Products, Inc.'s state of the art injection molding department has ten late model molding machines. The size range for these machines varies from 50 tons to 270 tons. All machines are equipped with process monitors that allow for fine tuning and control of the process. This ensures increased productivity and decreased reject cycles. All color and additive blending is controlled by gravimetric weigh blenders which allow for tight control of material blending. We specialize in long-run, high-volume injection molding. Our late model equipment allows us to produce the high quality parts you expect at a value that helps you maintain your competitive edge.

Late Model Injection Molding Machines with Closed Loop Process Control and Monitoring.
CAD/CAM Mold Building with the Latest CNC Machining and CNC EDM Technology.

MATERIALS
ABS * DELRYN * NYLON 6 & 6/6 POLYETHYLENE POLYPROPYLENE

SERVICES
MOLDING * MOLD FABRICATION * CNC MACHINING * METAL STAMPING * ROLL FORMING VALUE ADDED ASSEMBLY

PROCESSES

INJECTION MOLDING

Our injection molding department is designed to take advantage of the latest molding technology to produce the highest quality products, that you as a customer expect, at very competitive prices. All molds and molding areas are designed to operate in an automated environment as much as possible. By automating these processes we are able to control our labor costs while keeping machine time utilization at the highest possible level. Technicians are free to monitor quality and processes. Magnolia Metal & Plastic Products, Inc.'s state of the art injection molding department has ten late model molding machines. The size range for these machines varies from 50 tons to 270 tons.

All machines are equipped with process monitors that allow fine tuning and control of the process. This ensures increased productivity and decreased reject cycles. All color and additive blending is controlled by gravimetric weigh blenders which allow for tight control of material blending. This blending is managed by automated weight blenders mounted on each individual machine, these blenders are capable of batch accuracy of .001%. Polypropylene, ABS and Nylon are some of the resins currently processed.

Molds are designed with consideration given to the customers requirements for end use, dimensional tolerances, materials, quantity requirements, and price. In January 2001, in house mold design and manufacturing began. State of the art CNC machining and E.D.M. centers were installed. CAD/CAM software is employed to help automate the process between part concept and production tooling. Rapid prototyping is also offered to aid customers in making the step from concept to production. We specialize in long-run, high-volume injection molding. Our late model equipment allows us to produce the high quality parts you expect at a value that helps you maintain your competitive edge.

PROCESSES

ROLL FORMING AND STAMPING

Custom roll forming & custom metal stamping is performed on late model high-production equipment. With roll production rates from ten to three hundred feet per minute and die accelerator technology for high speed accurate cutting, we can provide cut to size parts to save you labor and scrap loss. We also offer post processing, punching, and assembly services to fit your specific needs.

PROCESSES

ROLL FORMING CAPABILITIES

Magnolia Metal & Plastic Products, Inc., operates four late model roll form lines, producing aluminum screen frame and steel reinforcing bars for the window industry. Roll forms are equipped with servo feed saw units allowing for tight tolerance cut length parts and stock length lineals. Roll formed aluminum is available in various sizes and colors. We are also equipped to handle custom roll forming of your current products.

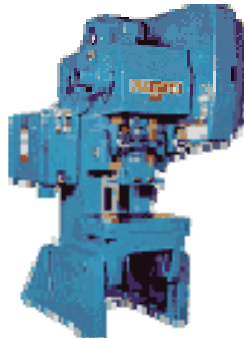

PROCESSES

METAL STAMPING

Equipped with late model stamping presses ranging in tonnage from 25 tons to 65 tons, we have the capabilities to fulfill all of your needs. With in-house capabilities to design and produce stamping dies, projects can be taken from concept to production easily.

We can process on your existing dies or design and build a die to fit your specific needs. All tooling is maintained by our in-house mold and die shop. Each die is inspected and preventive maintenance is performed following each run.

The metals we currently stamp are: aluminum, steel, and spring steel. We are capable of producing stamped products in either automatic or single stroke operations.

THE ADVANTAGES OF DOING BUSINESS WITH **MAGNOLIA METAL & PLASTICS** ARE MANY...

THE LATEST TECHNOLOGY

Our injection molding department is designed to take advantage of the latest molding technology to produce the highest quality products – that you as a customer expect. All molds and molding areas are designed to operate in an automated environment. Each injection-molding machine is equipped

with state-of-the art process controllers and process monitors. Technicians are free to monitor quality and processes. Blending of colors and additives is managed by automated weight blenders mounted on each individual machine. These blenders are capable of batch accuracy of .001%.

• Polypropylene, ABS and Nylon are some of the resins currently processed.

• Our custom roll forming and custom metal stamping are done on late-model high production equipment with roll production rates from 10 to 300 feet per minute. Die accelerator technology allows for high-speed accurate cutting. We can provide cut to size parts to save you labor and scrap loss.

THE PERSONAL TOUCH

If it's produced from metal or plastic, we can make it. We have the latest equipment, the latest software, and an experienced design and production staff. We understand that the quality of your product can rest with those who

make your components. We don't take that job lightly.

We, at Magnolia Metal & Plastics, are ready to work with you in finding ways to make your components better. You can be involved every step of the way – from design to prototype to production. Scratch it out on a piece of paper. We can take it from there. Provide us with detailed plans. We can have production started quickly. We'll do what it takes to give you what you want. We will produce your parts with the precision that will meet or exceed your standards.

DESIGN SERVICES

The newest service is our in-house mold design and manufacturing. State-of-the-art CNC machining and E.D.M centers have been installed. CAD/CAM software is employed to help automate the process between part concept and production tooling.

QUICK TURNAROUND

By designing and building molds and dies in-house, we are able to provide very fast turnaround from tool design to samples and then production parts. We can offer you rapid prototyping with lead times of one week or less. You can quickly make the step from concept to production. The use of standard mold components and inserts allow tools to be manufactured in as little as two weeks, depending on the complexity of the finished parts.

CUSTOM MACHINING

We offer custom machining and production machining, whether you require one special part or a production run of repetitive parts. In our roll forming & stamping division, we offer post processing, punching, and assembly services to fit

HIGHLIGHTS & BENEFITS OF OUR CORNERS

PULL-TAB CORNERS

There is no longer a need for separate pull-tabs that are splined into the track. The strength of having the pull-tab in the corner is measured by both vertical and horizontal manipulation of the screen, unlike only a horizontal lift of the previous splined in pull-tab. These pull-tab corners eliminate the need for a separate inventory and ensure that they are used 100% in each screen.

STOPS

Stops are located on the spline trackside of the corner and are cylindrical in shape and appearance. The stops are available on both the pull-tab corner as well as the no pull-tab corner for various configurations.

½ BALL

The ½ Ball is located on the back bottom side of the corner and allows for gentle weeping or "Breathing" of the screen. The ½ ball also has been found to work very well in allowing a 5/16's frame to fit into where a 3/8's frame can fit, thus allowing for inventory reduction by eliminating the need to stock the 3/8's frame and all known corners etc.

"SAFETY WARNING PULL TAB"

The newly patented & introduced corner is becoming a highly used component because of its cost savings potential. The "Safety Warning Pull-Tab" is an external or partially internal window/door screen frame - corner key that integrates the pull/lift tab with the industry recognized safety warning. By combining three, basic-but-necessary, needed components of a fabricated window / door insect screen into one "fabricator friendly" component. This corner eliminates the need to use the not-so-user-friendly adhesive safety warning labels and the secondary pull-tabs that are splined into the track on most if not all window/door screens. The "Safety Warning Pull-Tab" can be inverted for a top of screen application if necessary. This design is "elimination by innovation." The productivity and cost savings of the "Safety Warning Pull-Tab" come from increased fabricator productivity by eliminating placing adhesive safety warning labels and ensuring the proper mounting of the older splined in pull tab on every screen. Cost and additional time savings are found by inventory reduction of the adhesive warnings and old pull tabs, no longer discarding damaged adhesive warning labels due to wear and tear, and no longer discarding damaged old style pull-tabs from damage. *The "Safety Warning Pull-Tab" ensures 100% that the safety warning is on every screen produced.*

BENEFITS

All the corners listed above have a full one-inch exposed corner to give support to the various tab offerings. The conversion from the older style ¾" exposed corner to the full one inch does show you a **two [2] inch savings** of Screen Frame per screen as well. It does help simplify the cut logic, as you will no longer need a fractional decrease but now a whole number decrease when sizing the screen.

Parties hereby agree all purchases made are subject to the following conditions: Billing is payable in full according to the terms shown on each invoice. All payments are to be made to: Magnolia Metal & Plastic Products, Inc., 247 Armory Drive, Vicksburg, MS 39183. Billing not paid when due shall accrue interest on the net unpaid balance from maturity at the rate of 1.5% per month or the maximum legal allowed by law, whichever is less, until paid in full. The undersigned agrees to pay, in the event the indebtedness becomes delinquent and is referred to an attorney for collection: reasonable attorney fees, collection costs, and court costs. No merchandise may be returned without prior authorization. Authorized returns shall be freight pre-paid and subject to a restocking fee of no less than 20% with a minimum restock fee of \$5.00.
